- Perform high-precision manual assembly of production units according to work instructions
- Inspect incoming parts against specifications
- Operate test equipment and record data according to established procedures
- Inspect production units to ensure conformity to specifications
- Package and ship product
- Perform maintenance on production equipment (as trained)
- Perform quality assurance on the detectors as per work instructions
- Clean production area
- Assist engineers and technicians in setup of manufacturing equipment
- Assist in periodic inventory control
- Other tasks as instructed by supervisor

**Strong candidates will display the following characteristics:**

- Experience in electrical or mechanical assembly a plus
- Mechanical aptitude, good with your hands, good hand/eye coordination
- High school degree or GED equivalent
- Quick learner, able to work independently to specified instructions
- Attention to detail
- Dedication to quality
- Good communication skills, English speaking
- Able to work on feet all day; able to lift 25 pounds
- Experience working on assembly lines, clean room assembly, prototype production lines, or other production environments a plus
- Authorization to work in the U.S.
